Bart Plasmeijer

Senior Architect & AI Frontrunner · Founding Architect of SitecoreAI ·
LLM Agents, Azure, Cloud-Native
The Randstad, Netherlands

Summary

I was the founding architect of XM Cloud. The job was to move Sitecore's enterprise CMS completely off-premise and rebuild it as a composable SaaS product from the ground up. Same product, new foundation, zero on-prem. Within two years, it became Sitecore's fastest-growing product with 300+ clients on board, which taught me very quickly what platform decisions actually cost when they go wrong. Right now, I'm focused on shipping LLM-based systems in production. Not demos. Actual features: agent-based workflows, LLM integrations, context-aware tooling on Azure. That gap between a working prototype and something that holds under real load is where I spend most of my time. I work across all levels, pair with engineers who are stuck, run design reviews with tech leads, and jump into code reviews when that's where the real conversation is. I care about what ships, not what looks good in a diagram. Outside of Sitecore, I run Trabsoft, where I build custom solutions for clients: LLM tooling, MCP integrations, and agent frameworks baked around what a business actually needs. Working on something in LLM, agents, or cloud-native? Feel free to reach out. Core Strengths:- Leading AI-first strategy, architecture, and SDLC transformation- Designing autonomous systems, AI agents, and intelligent platform features- Owning long-term platform health, technical standards, and execution alignment- Driving clarity, alignment, and results across engineering teams- Mentoring teams in cloud-native, AI-first, and well-architected principles- Translating complex ideas into scalable, secure, and cost-efficient designs

Experience

Sitecore

6 years 9 months

Senior Architect

February 2026 - Present (6 months)

Amsterdam Area

- Own the technical direction for the platform: architecture decisions, standards, and the long-term shape of the system.
- Work with engineering teams on the hard problems: where the complexity is, where the debt is, what to tackle next.
- Designed and shipped agent-based systems and LLM integrations running in production on Azure today.
- Mentor and coach engineers across all levels, through pair programming, design reviews, and code reviews.

Senior System Architect | AI Front Runner SitecoreAI

February 2024 - March 2026 (2 years 2 months)

Amsterdam

- Set the architectural direction for SitecoreAI: the patterns, boundaries, and platform shape that teams built against.
- Took features from prototype to production. A lot of the early LLM work involved proving the concept first, then rebuilding it properly for scale and reliability.
- Kept a close eye on the platform's overall health across a fast-moving product: reliability, security, technical debt.

Founding Architect of Sitecore XM Cloud / SitecoreAI

July 2021 - February 2024 (2 years 8 months)

Amsterdam Area

- Started from a blank page. Moved Sitecore's enterprise CMS off on-premise entirely and redesigned it as a composable SaaS product from the ground up.
- Applied 12-Factor and Well-Architected principles from day one, which saved a lot of pain later as the product scaled.
- The decisions made here are still the foundations the platform runs on, carrying 300+ clients within two years of launch.

Senior Cloud Architect - Container Technologies

December 2020 - February 2024 (3 years 3 months)

Amsterdam, North Holland, Netherlands

I led Sitecore's container strategy and introduced modern cloud-native practices, taking ownership of platform reliability and developer experience.

Leadership impact:

- Defined direction for Kubernetes, GitOps, and SRE adoption across the product line.
- Mentored teams in cloud-native operations and architecture scalability.

- Ensured platform decisions aligned to business goals and customer outcomes.

Senior Software Architect - DevOps

November 2019 - December 2020 (1 year 2 months)

Amsterdam Area, Netherlands

As Senior Software Architect – DevOps, I owned the full architecture and delivery lifecycle of Sitecore’s demo assets and deployment pipelines. I set clear technical direction, ensured architectural quality, and drove a developer-first experience across teams.

Leadership & Impact:

- Led architecture for end-to-end demo environments, ensuring reliability, scalability, and ease of deployment.
- Set direction for DevOps practices across teams, improving developer experience and operational consistency.
- Took ownership of the architecture from design through delivery, ensuring high-quality standards and predictable outcomes.
- Introduced and championed containerization strategy, accelerating adoption of Sitecore containers.
- Provided key architectural guidance for container DevEx in Sitecore 9.3+, influencing the global community.

Trabsoft

Owner

February 2013 - Present (13 years 6 months)

Leusden, Utrecht, Netherlands

- Software and hardware development
- AI First (Agents and Tools)
- MCP

Valtech

3 years 5 months

Software Solutions Architect at Wolters Kluwer

September 2019 - November 2019 (3 months)

Amsterdam Area, Netherlands, New York

- OneWeb digital marketing transformation program (2018-Present): \$20M+ digital marketing transformation program focused on driving discoverability and value at scale. More tactically, merging of 268 marketing web sites into a single domain on a single shared platform, train the marketers on the platform

and state of the art digital marketing techniques, and transform the marketing organizations across the company into campaign and data driven teams.

Principal Software Architect at easyJet
January 2019 - November 2019 (11 months)
Amsterdam Area, Netherlands

Global Sitecore Architect
November 2016 - November 2019 (3 years 1 month)
Amsterdam Area, Netherlands

As a solution/software architect, I am focusing on delivering robust, scaled platforms. I am responsible for understanding the goals; capturing, refining, and challenging the requirements and constraints on the client's question. I always ensure that technical architecture works and that we own the risks. As a solution/architect, I take leadership and ownership of the architecture throughout the software delivery and set the quality assurance by setting standards, guidelines, principles, my motto, 'Getting Things Done'.

- Pioneer Sitecore containers in the community.

Global Solution Architect at L'Oréal Website Factory
November 2016 - August 2019 (2 years 10 months)
Paris Area, France

The architect on Global Digital Program at L'Oréal (EMEA/US/EPAC)

Kerastase, Essie, Redken, Garnier, L'Oréal Paris, La Roche Posay, Mixa, Hair.com, more to come soon...

Component store (refapp) Everything is a package!

Member of the Works Council
July 2016 - December 2018 (2 years 6 months)
Amersfoort/Utrecht/Amsterdam/Eindhoven, Utrecht Province, Netherlands

Senior Developer Valtech Netherlands
July 2016 - October 2016 (4 months)
Amersfoort, Utrecht Province, Netherlands

Valtech acquires @eFocus

Architect and Lead developer

NetWerk Groep B.V.

Member of the Works Council

December 2014 - August 2016 (1 year 9 months)

Utrecht Area, Netherlands

- eFocus
- Medicores
- Cure4
- Nines (sold)
- ShopWorks

eFocus

Senior Developer

March 2013 - July 2016 (3 years 5 months)

Amersfoort

Lead Architect and Lead Developer on the Digital Platform at FrieslandCampina

Melkweb is an online platform from FrieslandCampina for 15K+ dairy farmers. It facilitates communication and management between FrieslandCampina and the farmers.

- Milk production management
- Monitoring of milk production and quality
- Access to financial overviews and milk prices
- Tracking milk collection schedules
- Quality control
- Detailed quality reports
- Direct communication between farmers and FrieslandCampina
- Access to educational materials and trends

E-Force ICT B.V. Nederland

Technical Development Manager / Lead Developer

May 2011 - February 2013 (1 year 10 months)

Nijkerk

Web development in Umbraco, ASP.NET MVC development, E-Force CMS, E-Force ASP.NET MVC back-end / widget front-end MVC framework for Umbraco.

Mobile Control

Technical Development Manager

May 2011 - February 2013 (1 year 10 months)

Nijkerk

Modern Media

Senior Software Developer

August 2007 - May 2011 (3 years 10 months)

Web development. Creating custom modules for Clixmaster Studio. Private CMS based on ASP. NET MVC and NHibernate. Game portal development (multiplayer chat, multiplayer bingo game).

Griffid B.V.

Lead Architect / Project Manager

June 2004 - July 2007 (3 years 2 months)

Almere

Creator and Lead architect for the product Griffid Monitoring Station, an IP-based real time video monitoring/recording system.

Perfect Connection B.V.

Senior Software Engineer

1999 - January 2005 (6 years)

Almere

Custom software development: Document Information Archiving System, sample and registration system, Terminal emulator for 'Return Material Authorization', etc

Startup Griffid monitoring station for 1.5 years

PRIMAX

Engineer / Software Engineer

1995 - 1999 (4 years)

Primax Phodox Scanner, PowerTwain, Primax Datapen, Scan&Fun, Mouse

MSO makes IT work!

Hardware Engineer

1992 - 1994 (2 years)

Nieuwegein

MMSO (Multi Micro Service Organisatie)
